EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with **Mr. Jack Benefiel** on **September 20, 2006**.

The application has been amended as follows:

Claims 6 and 7 have been cancelled.

Claim 8 (New) A machine tool coolant system comprising:
a plurality of machine tools and associated sumps;
return piping for receiving dirty coolant from said plurality of machine tools;
a filtration apparatus for providing a source of filtered coolant;
a pump for delivering said filtered coolant to said machine tools via supply piping;
a bypass line connecting said supply piping and said return piping to enable introduction of a make-up flow of filtered coolant into said return piping, thereby bypassing said machine tools; and
a pressure reducing valve interposed in said bypass line responsive to pressure in said return piping to cause a make-up flow of filtered coolant therethrough into said return piping just sufficient to maintain a pre-set pressure in said return piping corresponding to a pre-selected minimum flow velocity in said return piping.

Claim 9 (New) The system of claim 8 further comprising a pressure maintaining valve interposed in said bypass line and closing as necessary to maintain a minimum upstream pressure in said supply piping sufficient to supply said plurality of machine tools.

Examiner's Comment

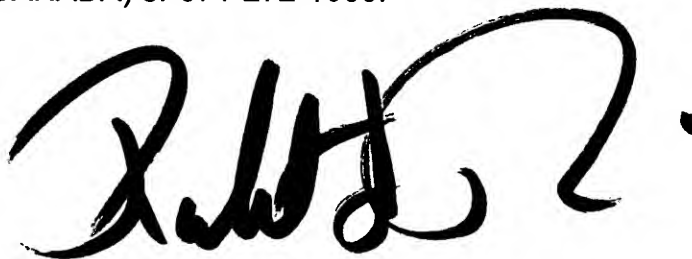

The claims were re-drafted in the manner set forth at 37 CFR 1.75(i) for the sake of clarity. Applicant's arguments previously presented against Maier were found persuasive.
